

Carbicure 10 Tablet

Brand Name: Carbicure 10 Tablet

Dosage Form: Tablet

Composition:

- **Carbimazole (10 mg)**

Therapeutic Segment:

Antithyroid / Endocrine Segment

Therapeutic Indication:

Carbicure 10 Tablet is prescribed for the **treatment and management of hyperthyroidism (overactive thyroid gland) and Graves' disease**. It helps to **reduce excessive thyroid hormone production**, restoring normal hormonal and metabolic balance.

It helps in:

- Managing symptoms like **weight loss, rapid heartbeat, irritability, and heat intolerance**
- **Preparing patients for thyroid surgery or radioactive iodine therapy**
- Controlling thyroid hormone levels during long-term therapy

Mechanism of Action:

- **Carbimazole** is converted to **methimazole** in the body, which **inhibits thyroid peroxidase enzyme**, a key catalyst in the synthesis of thyroid hormones (T3 and T4).
- This results in **reduced thyroid hormone production**, helping maintain normal thyroid activity.

Dosage & Administration:

- Take **as directed by the physician**, usually once or twice daily after meals.
- Swallow whole with water, without crushing or chewing.

Contraindications:

- Hypersensitivity to **carbimazole or thionamides**
- **Severe hepatic impairment**
- Use during **pregnancy or breastfeeding** should be under medical supervision only

Warnings & Precautions:

- Regular **thyroid function and blood count monitoring** is essential during therapy.

- Discontinue and consult a doctor if **fever, sore throat, or signs of infection** appear (possible agranulocytosis).
- Use cautiously in patients with **liver dysfunction**.

Possible Side Effects:

- Nausea, stomach upset
- Skin rash, itching
- Headache or joint pain
- Rare: Agranulocytosis (low white blood cell count)

Storage:

Store in a **cool, dry place below 25°C**, protected from light and moisture.

Segment:

Antithyroid / Endocrine Segment – It helps in **reducing thyroid hormone overproduction and managing symptoms of hyperthyroidism effectively**.
