

# Acarbridge 25 Tablets

**Brand Name:** Acarbridge 25 Tablet

**Dosage Form:** Tablet

**Composition:**

**Each tablet contains:**

- Acarbose IP 25 mg
- 

**Description:**

Acarbridge 25 Tablet contains Acarbose, an alpha-glucosidase inhibitor used in the management of type 2 diabetes mellitus. It acts within the gastrointestinal tract to delay the digestion and absorption of complex carbohydrates. It helps in reducing post-prandial blood glucose excursions and improving overall glycemic control when used along with dietary modifications and exercise.

---

**Indications:**

**Indicated for the treatment of:**

- Type 2 diabetes mellitus
- Management of post-prandial hyperglycemia
- Adjunct to diet and exercise for glycemic control

It helps in controlling post-meal blood glucose levels and maintaining long-term glycemic stability.

---

**Dosage & Administration:**

Dosage should be as directed by the physician.

The tablet should be taken orally at the start of each main meal or with the first bite of food.

Regular monitoring of blood glucose levels is recommended during therapy.

---

**Pharmacological Action:**

- Acarbose competitively inhibits intestinal alpha-glucosidase enzymes responsible for the breakdown of complex carbohydrates into absorbable monosaccharides.
- This delays carbohydrate digestion and glucose absorption from the intestine.

These actions help in reducing post-prandial blood glucose spikes and improving glycemic control.

---

**Side Effects:**

Common side effects include flatulence, abdominal discomfort, bloating, diarrhea, and gastrointestinal disturbances.

These effects are generally mild and tend to decrease with continued therapy.

---

**Precautions & Warnings:**

- Use with caution in patients with inflammatory bowel disease, intestinal obstruction, or significant gastrointestinal disorders
- Monitor liver function during prolonged therapy
- If hypoglycemia occurs during combination therapy, glucose (dextrose) should be used

**instead of sucrose**

**• Not indicated for type 1 diabetes mellitus or diabetic ketoacidosis**

---

**Drug Interactions:**

**May interact with other antidiabetic agents, increasing the risk of hypoglycemia.**

**Digestive enzyme preparations and intestinal adsorbents may reduce the effectiveness of Acarbose.**

---

**Storage:**

**Store below 25°C in a cool, dry place.**

**Protect from light and moisture.**

**Keep out of reach of children.**
