

Alfa-Calostyle Plus Softgel Capsule

Alfacalcidol 0.25 mcg + Calcium Carbonate 500 mg Tablet

Composition:

Each tablet contains:

- Alfacalcidol 0.25 mcg** – A vitamin D analog that aids in calcium absorption and bone metabolism
- Calcium Carbonate 500 mg** – A crucial source of elemental calcium for maintaining strong bones

Segment:

Ortho | Bone & Joint Care | Osteoporosis Management

Brand Name:

[Your Brand Name Here]

Primary Indication:

- Calcium and vitamin D supplementation
- Bone health and osteoporosis prevention

Secondary Indications:

- Osteoporosis treatment to prevent bone loss and fractures, especially in postmenopausal women
- Calcium and vitamin D deficiency management
- Chronic kidney disease (CKD) support to prevent renal osteodystrophy
- Prevention of osteomalacia and rickets for bone strength and development
- Post-surgical bone healing support for faster recovery
- Bone strength maintenance in elderly individuals

Product Overview and Mode of Action

This tablet is designed to **improve calcium metabolism, enhance bone density, and prevent calcium deficiency-related disorders**. It is widely prescribed for **elderly individuals, postmenopausal women, individuals with chronic diseases, and those at risk of fractures or bone demineralization**.

How Each Ingredient Works:

1. Alfacalcidol (0.25 mcg)

- Precursor of active vitamin D3 (calcitriol), which enhances calcium absorption
- Supports bone mineralization and remodeling to prevent osteoporosis
- Beneficial for patients with chronic kidney disease who have impaired natural vitamin D activation

2. Calcium Carbonate (500 mg)

- Essential source of elemental calcium for maintaining bone strength
- Helps in muscle contraction and nerve function
- Reduces the risk of bone fragility and fractures

Key Benefits:

- Enhances bone mineralization and density
- Reduces the risk of osteoporosis and fractures
- Supports muscle and nerve function
- Essential for bone growth and development in children and adolescents
- Beneficial for patients with chronic kidney disease to prevent calcium imbalance
- Helps in faster recovery after fractures and bone surgeries

Who Needs This Tablet?

- Postmenopausal women requiring osteoporosis prevention
- Elderly individuals at risk of fractures and bone loss
- Children and adolescents for healthy bone growth
- Individuals with calcium and vitamin D deficiency
- Patients with chronic kidney disease requiring calcium supplementation
- Patients recovering from bone fractures or osteoarthritis

Recommended Dosage and Usage Guidelines:

- Usual dosage: One tablet per day or as prescribed by a healthcare professional
- Best taken after meals for improved calcium absorption
- Sufficient water intake is recommended to aid calcium metabolism
- Do not exceed the recommended dose to prevent hypercalcemia

Precautions and Warnings:

Consult a Doctor If You Have:

- Kidney disease or high calcium levels in the blood
- Hyperparathyroidism or other endocrine disorders
- Heart or liver conditions that require calcium level monitoring

Possible Drug Interactions:

- Diuretics, which may increase calcium levels and require careful monitoring
- Corticosteroids and anticonvulsants that may reduce calcium absorption
- Antacids and iron supplements that may interfere with calcium metabolism

Storage Instructions:

- Store in a cool, dry place, away from direct sunlight and moisture
- Keep out of reach of children

Packaging Information:

- Available in 10x10 and 10x15 blister packs
- Custom packaging options available for bulk orders

Why Choose This Product for PCD Pharma Franchise and Export?

- WHO-GMP certified manufacturing ensuring high quality and compliance
- High market demand due to increasing need for bone health supplements
- Competitive pricing for PCD pharma franchise, bulk supply, and third-party manufacturing
- Custom branding and packaging options for domestic and international markets
- Trusted by healthcare professionals for osteoporosis, CKD, and bone health support

Meta Titles and Descriptions for Pharma Opportunities:

1. PCD Pharma Franchise

Meta Title: Alfacalcidol 0.25 mcg + Calcium Carbonate 500 mg | Bone Health Tablet | Best Price for PCD Pharma Franchise

Meta Description: Alfacalcidol 0.25 mcg + Calcium Carbonate 500 mg tablet supports bone health, osteoporosis, and calcium deficiency. WHO GMP certified. Available at the best price for PCD pharma franchise opportunities.

2. Contract Manufacturing / Third-Party

Meta Title: Alfacalcidol + Calcium Carbonate Tablet | Bone Care Supplement | Pharma Third-Party Manufacturing

Meta Description: High-quality WHO-GMP certified Alfacalcidol + Calcium Carbonate tablet for bone health. Available for third-party pharma

manufacturing and bulk supply at competitive prices.

3. Export

Meta Title: Alfacalcidol 0.25 mcg + Calcium Carbonate 500 mg | Bone Health Tablet | Pharma Export Supplier

Meta Description: WHO-GMP certified Alfacalcidol + Calcium Carbonate tablet for strong bones and osteoporosis prevention. Available for international pharma export and bulk orders.

4. Pharma Franchise

Meta Title: Alfacalcidol + Calcium Carbonate Tablet | Bone Health Supplement | Pharma Franchise Opportunity

Meta Description: Get a pharma franchise for Alfacalcidol + Calcium Carbonate tablets. Supports bone health and calcium metabolism. WHO GMP certified. Partner with us today.

5. Special Segment Franchise

Meta Title: [Brand Name] Bone Health Tablet | Strong Bones and Osteoporosis Prevention

Meta Description: [Brand Name] bone health tablet with Alfacalcidol + Calcium Carbonate ensures strong bones and prevents osteoporosis. WHO GMP certified. Available for pharma franchise and third-party manufacturing.

Conclusion

Alfacalcidol 0.25 mcg + Calcium Carbonate 500 mg tablet is a scientifically formulated supplement designed to support **bone strength, calcium absorption, and osteoporosis prevention**. It is an ideal product for **healthcare professionals, pharma distributors, and international markets** looking for **high-quality bone care formulations**.
