

Altretamine 50

Capsules

Altretamine Capsules USP 50mg

Effective Anti-Cancer Agent

Altretamine is an alkylating agent used in the treatment of ovarian cancer and other malignancies.

Selective Cytotoxic Action

Exerts selective toxicity on cancer cells by interfering with DNA function and inhibiting cell proliferation.

Proven Therapeutic Efficacy

Clinically proven to improve response rates in ovarian cancer when used as per standard protocols.

Well Tolerated

Has a manageable safety profile with appropriate patient monitoring and dose adjustments.

Supports Better Outcomes

Helps in extending progression-free survival and improving quality of life in cancer patients.

INDICATIONS

Ovarian Cancer

Advanced Ovarian
Carcinoma

Recurrent Ovarian
Cancer

Combination Chemotherapy
Regimens

Other Malignancies
(As Prescribed)
