

Dual Action for Superior
Cholesterol Control

Atorable™ -EZ 40 Tablets

Atorvastatin (40mg) + Ezetimibe (10mg) Tablets

- Helps lower elevated LDL (bad cholesterol) levels in the blood.
- Reduces cholesterol absorption and production for better lipid control.
- Supports cardiovascular health and lowers the risk of heart-related complications.
- Helps prevent plaque buildup in arteries and improves blood circulation.
- Useful in patients with mixed dyslipidemia and hypercholesterolemia.
- Helps maintain healthy cholesterol levels in patients with diabetes, hypertension, or existing heart disease.

Indications:

- High LDL Cholesterol
- Mixed Dyslipidemia

- Hypercholesterolemia
- Cardiovascular Risk Reduction
