

Atozyle 300

Capsules

Atazanavir I.P 300 mg

Potent Antiviral Activity

Atazanavir inhibits HIV-1 protease, preventing viral replication and reducing viral load.

Effective Viral Suppression

Helps achieve and maintain viral suppression in HIV-1 infected patients.

Boosts Immune Function

Improves CD4+ cell count and helps strengthen the immune system.

Once Daily Dosing

Convenient once-daily regimen improves adherence and patient compliance.

Well Tolerated

Generally well tolerated with a favorable safety and tolerability profile.

INDICATIONS

HIV-1 Infection in Adults

HIV-1 Infection in Adolescents

Combination Antiretroviral Therapy (cART)

Treatment-Experienced
HIV-1 Patients
