

Information For the User
Azithromycin (1% w/w) Eye Ointment

Azoxone Eye Ointment

Brand Name: Azoxone Eye Ointment

Dosage Form: Eye Ointment

Composition:

Each gram contains:

- **Azithromycin IP 1% w/w**
-

Description:

Azoxone Eye Ointment contains **Azithromycin**, a macrolide antibiotic for ophthalmic use. It helps in **treating bacterial eye infections by inhibiting bacterial protein synthesis**, reducing infection and ocular inflammation.

Indications:

Indicated for:

- Bacterial conjunctivitis
- Other superficial bacterial eye infections caused by susceptible organisms

It helps in **eliminating bacterial pathogens and relieving ocular redness, irritation, and discharge**.

Dosage & Administration:

Apply a thin ribbon into the conjunctival sac 2–3 times daily or as directed by the physician. Avoid contact of the tube tip with the eye or eyelids.

Pharmacological Action:

Azithromycin binds to the 50S ribosomal subunit of bacteria, inhibiting protein synthesis and leading to bacterial cell death. Effective against many Gram-positive and Gram-negative ocular pathogens.

Side Effects:

Mild transient burning, stinging, or eye irritation may occur in some patients.

Warnings & Precautions:

- Avoid use in viral or fungal eye infections unless prescribed with appropriate therapy.
 - Discontinue if hypersensitivity or severe irritation occurs.
 - Not recommended for prolonged use without physician supervision.
-

Drug Interactions:

Concurrent ophthalmic medications should be used cautiously as directed by the physician.

Storage:

Store below 25°C in a cool, dry place. Protect from light and moisture.
Keep out of reach of children.
