

Composition :-

Betamethasone 0.1% w/v.
Neomycin 0.5% w/v.

Betaprol-N

Eye Drops

Betamethasone 0.1% w/v + Neomycin 0.5% w/v

Betamethasone is a potent corticosteroid that reduces inflammation, redness and swelling in eye conditions.

Neomycin is an effective aminoglycoside antibiotic that fights a wide range of bacterial infections.

Combined action helps provide quick relief from infection and inflammation.

Helps relieve symptoms such as **redness, irritation, itching** and **watering**.

Supports **faster recovery** and helps prevent complications.

Indications

Allergic
Conjunctivitis

Bacterial
Conjunctivitis

Blepharitis

Post-operative
Inflammation

Ocular Infections

Eye Irritation &
Redness
