

Bisopair A 2.5 Tablet

Bisopair A 2.5 Tablet

Composition:

Each tablet contains:

- **Bisoprolol Fumarate IP** – 2.5mg
- **Amlodipine Besylate IP** eq. to Amlodipine – 5mg
- **Excipients** – q.s.

Description:

Bisopair A 2.5 Tablet is a **combination of a beta-blocker (Bisoprolol) and a calcium channel blocker (Amlodipine)**, used for the **effective management of hypertension and angina**. This combination helps **lower blood pressure, reduce heart rate, and improve blood flow**, ensuring optimal cardiovascular health.

Indications:

- **Hypertension (High Blood Pressure)**
- **Chronic Stable Angina**
- **Cardiovascular Risk Management**

Dosage & Administration:

- **One tablet once daily**, or as prescribed by a physician.
- Can be taken **with or without food**, at the same time each day.

Contraindications:

- **Severe hypotension (low blood pressure)**
- **Bradycardia (slow heart rate)**
- **Cardiogenic shock or heart block**
- **Severe hepatic or renal impairment**

Warnings & Precautions:

- Use with caution in **diabetic patients**, as Bisoprolol may mask symptoms of hypoglycemia.
- Sudden discontinuation should be avoided to prevent **rebound hypertension or angina**.
- Regular monitoring of **blood pressure and heart rate** is recommended.

Adverse Effects:

- **Dizziness, fatigue, and headache**
- **Bradycardia (slow heart rate)**
- **Swelling in feet or ankles (due to Amlodipine)**

- **Hypotension (low blood pressure)**

Storage:

- Store below **30°C**, in a **cool, dry place**, away from moisture and direct sunlight.
- Keep out of reach of **children**.
