

Buditerm™ 200

Budesonide (200mcg) Inhaler

- Inhaled corticosteroid used for long-term control of airway inflammation.
- Reduces swelling, redness, and mucus production in the airways.
- Helps prevent asthma attacks when used regularly.
- Improves lung function and breathing comfort over time.
- Decreases frequency and severity of wheezing and breathlessness.
- Not intended for immediate relief of acute asthma attacks.
- Suitable for maintenance therapy in chronic respiratory conditions.
- Helps reduce rescue inhaler dependence with regular use.
