

Buditerm 1 Respule

Brand Name: Buditerm 1 Respule

Dosage Form: Respule / Inhalation Suspension

Composition:

Each respule contains:

- **Budesonide IP 1 mg**

Description:

Buditerm 1 Respule contains **Budesonide**, a corticosteroid for inhalation. It helps in **reducing airway inflammation, controlling bronchial hyperreactivity, and preventing asthma exacerbations**. Regular use provides effective management of chronic respiratory conditions.

Indications:

Indicated for:

- Asthma – maintenance therapy
- Chronic obstructive pulmonary disease (COPD) – as adjunct therapy
- Prevention of exacerbations in reactive airway disease

It helps in **improving breathing, reducing wheezing, and decreasing the frequency of asthma attacks**.

Dosage & Administration:

Dosage should be individualized as directed by the physician.

Administer using a nebulizer or as per device instructions.

Rinse mouth after inhalation to reduce risk of oral candidiasis.

Pharmacological Action:

Budesonide is a glucocorticoid that binds to steroid receptors, suppressing inflammatory gene expression and reducing release of mediators responsible for airway inflammation.

Side Effects:

Mild throat irritation, hoarseness, or cough may occur in some patients.

Precautions & Warnings:

- Use with caution in patients with active infections of the respiratory tract.
- Monitor for signs of adrenal suppression in long-term therapy.
- Not for relief of acute asthma attacks.

Drug Interactions:

May interact with strong CYP3A4 inhibitors or other corticosteroids.

Storage:

Store below **25°C**, in a dry place.

Protect from light and moisture.

Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.
