

Burntyle Cream

Aminacrine HCl 0.1g + Cetrimide 0.5g Cream

Composition:

Aminacrine Hydrochloride 0.1g + Cetrimide 0.5g

Segment:

Antiseptic & Wound Care

Brand Name:

[Specify Brand Name]

Primary Indication:

Topical antiseptic for wound healing and infection prevention

Secondary Indications:

- Treatment of minor cuts, burns, abrasions, and insect bites
- Prevention of bacterial infections in wounds and ulcers
- Management of post-surgical wounds to reduce infection risk
- First-aid application for minor skin injuries
- Antiseptic treatment for pressure sores and skin infections

Product Description:

Aminacrine HCl 0.1g + Cetrimide 0.5g Cream is a topical antiseptic formulation designed for the treatment and prevention of infections in wounds, cuts, burns, and skin abrasions. The combination of **Aminacrine Hydrochloride** and **Cetrimide** provides a dual-action effect against a wide range of bacteria, fungi, and other harmful microorganisms.

Aminacrine Hydrochloride is a well-known antimicrobial agent that inhibits bacterial DNA replication, effectively controlling infections and preventing their spread. It is widely used in wound

care to eliminate bacteria that could cause delayed healing or complications.

Cetrimide, a cationic surfactant with strong disinfectant properties, acts as a cleansing agent, removing dirt, dead tissue, and bacteria from the wound surface. It also helps maintain a sterile environment that promotes faster wound healing. Its emollient effect keeps the skin moisturized, reducing irritation and discomfort.

This antiseptic cream is widely used in hospitals, clinics, and first-aid settings for treating minor injuries and post-surgical wounds. Its non-greasy formulation allows for easy application and absorption, ensuring long-lasting protection.

Key Benefits:

- **Broad-Spectrum Antiseptic Action:** Effective against bacteria, fungi, and other microbes
- **Promotes Wound Healing:** Helps prevent infections that delay healing
- **Prevents Secondary Infections:** Creates a protective barrier over the wound
- **Skin-Friendly Formulation:** Non-irritating and easy to apply
- **Versatile Use:** Suitable for minor injuries, burns, ulcers, and post-surgical wounds

Usage Instructions:

1. Clean the affected area with mild soap and water before applying the cream.
2. Apply a thin layer of the cream to the wound or affected area.
3. Cover with a sterile dressing if necessary.
4. Use 2-3 times daily or as directed by a healthcare professional.

Precautions & Warnings:

- For external use only.
- Avoid contact with eyes, mouth, and other mucous membranes.
- Do not apply to deep or puncture wounds without medical supervision.

- If irritation or an allergic reaction occurs, discontinue use and seek medical advice.
- Store in a cool, dry place away from direct sunlight.

Packaging Information:

Available in **15g, 30g, and 50g tubes** for retail and hospital use.

Meta Titles & Descriptions:

1. PCD Pharma Franchise

Meta Title: Aminacrine HCl 0.1g + Cetrимide 0.5g | Antiseptic Cream | Best Price for PCD Pharma Franchise

Meta Description: Aminacrine HCl 0.1g + Cetrимide 0.5g antiseptic cream for wound healing and infection prevention. WHO GMP certified. Available at the best price for PCD pharma franchise opportunities.

2. Contract Manufacturing / Third-Party

Meta Title: Aminacrine HCl + Cetrимide Cream | Antiseptic Ointment | Pharma Third-Party Manufacturing

Meta Description: Aminacrine HCl + Cetrимide antiseptic cream for wound healing and infection control. WHO GMP certified. Reliable third-party pharma manufacturing and bulk supply available.
