

Buspinil 5

Tablets

Buspirone Hydrochloride Tablets IP 5mg.

Buspirone Hydrochloride is an **anxiolytic** that helps reduce symptoms of anxiety without causing sedation.

Acts as a serotonin **5-HT_{1A} receptor partial agonist**, helping to restore the balance of neurotransmitters.

Effective in the treatment of **Generalized Anxiety Disorder (GAD)**.

Non-sedating and **non-addictive**, making it suitable for long-term use.

Improves overall **quality of life** by reducing excessive worry and tension.
