

Cabstyle™

Cabstyle™ 0.5 Cabergoline (0.5mg) Tablets

Cabstyle™ 0.25 Cabergoline (0.25mg) Tablets

Woman's best Friend during Motherhood....

- **Cabergoline** belongs to a class of drugs called 'dopamine agonists'. Dopamine is naturally formed in the body and helps to send signals to the brain, which treats hyperprolactinemia (high levels of prolactin, a natural substance that helps breast development and milk production in women).
- **Cabstyle 0.5** Tablet 4's can also be used to treat other conditions caused by hormonal disruption that can lead to the production of high levels of prolactin. This includes lack of periods, infrequent and very light menstruation, periods when there is no ovulation, and without breast-feeding, the secretion of milk from your breast.

**Reduce the High Level of
Hormone Prolactin with....**
