

Catalens

Eye Drops

10 ML

To combat
**corneal
oedema
& vitreous
haemorrhage**

INDICATIONS

Contraract

Corneal oedema

Vitreous haemorrhage

Ocular nerve atrophy

Potassium Iodide 3.3% + Sodium Chloride 0.83% + Calcium Chloride 1% Eye Drop

Prevents the early formation of cataract

- ⌘ The Potassium may reduce corneal oedema by supporting glycolysis & metabolic activity.
- ⌘ Prevents corneal damage from secondary oedema.
- ⌘ Aids in the resorption of various pathological deposits.
- ⌘ Ideal combination for various haemorrhage.

Well tolerated & non-irritating. Recommended in the visual cortex, reduces corneal thickness and promotes epithelial regeneration.

* Care & convenience together *
