

Information For the User
Celecoxib (200mg) Capsule

Celecrib 200 Capsule

Brand Name: Celecrib 200 Capsule

Dosage Form: Capsule

Composition:

Each capsule contains:

- Celecoxib 200 mg

Description:

Celecrib 200 Capsule contains **Celecoxib**, a selective COX-2 inhibitor used for managing pain and inflammation. It helps in providing effective relief from symptoms associated with osteoarthritis, rheumatoid arthritis, ankylosing spondylitis, and acute pain conditions.

Therapeutic Indication:

Indicated for the management of:

- Osteoarthritis
- Rheumatoid arthritis
- Ankylosing spondylitis
- Acute musculoskeletal pain

It helps in reducing inflammation, swelling, and pain.

Dosage & Administration:

Take as directed by the physician.

Swallow the capsule whole with water, with or without food.

Pharmacological Action:

Celecoxib selectively inhibits the COX-2 enzyme, reducing the formation of prostaglandins responsible for inflammation and pain, while sparing COX-1, leading to better gastrointestinal safety.

Side Effects:

Generally well tolerated. Mild indigestion, slight abdominal pain, or dizziness may occur in some patients.

Warnings & Precautions:

- Use with caution in patients with cardiovascular disease or gastrointestinal risk.
- Avoid use in severe hepatic or renal impairment.
- Not recommended during late pregnancy.
- Monitor for signs of gastrointestinal discomfort or swelling during therapy.

Drug Interactions:

May interact with anticoagulants, antihypertensives, diuretics, and other NSAIDs.

Storage:

Store below 25°C in a cool, dry place. Protect from light and moisture. Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.
