

Information For the User
Chloramphenicol (10mg) + Hydrocortisone (5mg) Eye Ointment

Chlorityle H Ointment

Brand Name: Chlorityle H Ointment

Dosage Form: Eye Ointment

Composition:

Each gram contains:

- **Chloramphenicol IP 10 mg**
 - **Hydrocortisone IP 5 mg**
-

Description:

Chlorityle H Ointment is a combination of an antibiotic (**Chloramphenicol**) and a corticosteroid (**Hydrocortisone**) for topical ophthalmic use. It helps in **treating bacterial eye infections associated with inflammation, redness, and irritation.**

Indications:

Indicated for:

- Bacterial conjunctivitis
- Allergic or inflammatory eye conditions with secondary bacterial infection

It helps in **reducing bacterial growth, inflammation, and ocular discomfort.**

Dosage & Administration:

Apply a thin ribbon into the conjunctival sac 2–3 times daily or as directed by the physician. Wash hands before application and avoid contact with the tip of the tube to the eye.

Pharmacological Action:

- **Chloramphenicol:** Inhibits bacterial protein synthesis, effectively controlling bacterial infections.
 - **Hydrocortisone:** Reduces inflammation, redness, and swelling by suppressing immune-mediated responses.
-

Side Effects:

Mild eye irritation, burning, or stinging may occur in some patients.

Warnings & Precautions:

- Avoid prolonged use to prevent steroid-induced ocular complications.
 - Use cautiously in patients with viral, fungal, or mycobacterial eye infections.
 - Discontinue if hypersensitivity or severe irritation occurs.
-

Drug Interactions:

Avoid concurrent use with other ophthalmic medications unless prescribed.

Storage:

Store below 25°C in a cool, dry place. Protect from light and moisture.
Keep out of reach of children.
