

Information For the User
Cilnidipine 10 mg tablet

Cildraw 10 Tablet

Cildraw 10 Tablet

Composition

Each film-coated tablet contains:

- Cilnidipine IP ... 10 mg
Excipients ... q.s.

Dosage Form

Tablet (oral administration).

Therapeutic Category

Antihypertensive – Calcium Channel Blocker (L/N-type).

Indications

Cildraw 10 Tablet is indicated for:

- Management of essential hypertension
- Reduction of blood pressure in patients at risk of cardiovascular complications
- May be used as monotherapy or in combination with other antihypertensive agents

It works by blocking calcium influx through L- and N-type calcium channels, resulting in vasodilation and reduced blood pressure.

Dosage & Administration

- **Adults:** 10 mg once daily, orally, with or without food.
- Dose may be adjusted up to 20 mg daily based on response and physician guidance.
- Administer at the same time each day for optimal effect.

Contraindications

- Hypersensitivity to Cilnidipine or any excipients
- Severe hypotension
- Cardiogenic shock
- Pregnancy and lactation unless prescribed

Warnings & Precautions

- Use with caution in patients with severe hepatic impairment or heart failure
- Monitor blood pressure and heart rate periodically
- Discontinue if signs of hypotension or severe adverse effects occur

Adverse Effects

Common: Dizziness, headache, flushing, palpitations, edema.

Rare: Gastrointestinal disturbances, rash, hypersensitivity reactions.

Drug Interactions

May interact with other antihypertensives, CYP3A4 inhibitors/inducers, and grapefruit juice (may increase plasma concentration).

Storage

Store in a cool, dry place below 25°C. Protect from light and moisture. Keep out of reach of children.
