

Wings of **freedom** for
Hypertensive Heart

Cildraw - 20

Cilnidipine Tablets IP 20mg

INDICATIONS

Hypertension

Myocardial Infarction

Angina Pectoris

Coronary heart Disease

- 💧 Cilnidipine significantly reduces higher blood pressure and pulse rate in hypertensive patients especially in the morning and at night.
- 💧 Improves renal function and lipid metabolism compared to other Calcium Channel Blockers. Significantly less pedal edema and dizziness compared to Amlodipine.
- 💧 Is a long acting, new generation inhibitor of both L-and N-type Calcium Channels.
