

Information For the User
Cilnidipine 5 mg tablet

Cildraw 5 Tablet

Brand Name: Cildraw 5 Tablet

Composition:

Each film-coated tablet contains:

Cilnidipine IP 5 mg

Therapeutic Indication:

Indicated for the treatment of essential hypertension

Also used in the management of mild to moderate cases of high blood pressure in patients with diabetes or metabolic syndrome

Helps in reducing cardiovascular risk and controlling blood pressure effectively

Mechanism of Action:

Cilnidipine is a dihydropyridine calcium channel blocker

It inhibits L-type calcium channels in vascular smooth muscle and N-type calcium channels in sympathetic nerve endings

This dual action reduces peripheral vascular resistance and suppresses sympathetic nerve activity leading to sustained blood pressure control

Dosage & Administration:

Usual adult dose: 5 to 10 mg once daily or as directed by the physician

Take the tablet with water preferably at the same time each day

Dose may be adjusted based on clinical response and patient tolerability

Contraindications:

Hypersensitivity to Cilnidipine or any component of the formulation

Severe aortic stenosis cardiogenic shock or recent myocardial infarction

Pregnancy and lactation unless advised by a physician

Warnings & Precautions:

Use with caution in patients with hepatic impairment

Monitor blood pressure and heart rate regularly

Avoid sudden withdrawal to prevent rebound hypertension

May cause dizziness especially during initiation of therapy

Side Effects:

Common: dizziness headache flushing ankle edema

Less common: palpitations fatigue nausea

Rare: hypotension allergic reactions hepatic enzyme elevation

Storage:

Store in a cool dry and dark place below 25°C

Protect from moisture and direct sunlight

Keep out of reach of children

Packaging:

Cildraw 5 Tablet is available in strip or blister packs

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
