

Information For the User
Citicoline (1000mg) Injection

Citiflip 1000 Injection

Brand Name: Citiflip 1000 Injection

Dosage Form: Injection

Composition:

- **Citicoline I.P. 1000 mg**

Therapeutic Segment:

Neuroprotective / Nootropic Segment

Therapeutic Indication:

Citiflip 1000 Injection is used in the management of **neurological disorders** and **brain injuries**. It helps in:

- **Stroke recovery (ischemic and hemorrhagic)**
- **Head injury and trauma-related brain damage**
- **Cognitive impairment and memory loss**
- **Parkinson's disease and Alzheimer's disease support therapy**
- **Neurodegenerative conditions**

It helps in **enhancing brain function, improving memory, and protecting nerve cells** from damage.

Mechanism of Action:

- **Citicoline** acts as a **neuroprotective agent** that restores phospholipid content in neuronal membranes.
- Enhances **acetylcholine synthesis**, improving neurotransmission.
- Promotes **neuronal repair and regeneration**, thereby supporting recovery after brain injury.
- Improves **cerebral blood flow and metabolism**.

Dosage & Administration:

- Administered via **intravenous (IV)** or **intramuscular (IM)** route as directed by a physician.
- Dose and duration depend on the **severity of the neurological condition**.

Contraindications:

- Hypersensitivity to **citicoline**
- Not recommended in patients with **severe hypertonia**

Warnings & Precautions:

- Use with caution in patients with **liver or kidney disorders**.
- Monitor for **blood pressure changes** during treatment.
- Avoid mixing with medications containing **meclofenoxate**.

Possible Side Effects:

- Headache, insomnia
- Dizziness
- Nausea, diarrhea
- Transient hypotension or bradycardia (rare)

Storage:

Store below 25°C, protected from light and moisture.

Do not freeze.

Segment:

Neuroprotective Segment – It helps in **improving cognitive functions, enhancing brain metabolism, and aiding recovery from stroke or head injury**.
