

Information For the User
Citicoline (500mg) + Piracetam (400mg) Syrup

Citiflip P Syrup

Citiflip P Syrup

Dosage Form: Syrup

Composition:

Each 5 ml contains:

- Citicoline IP 500 mg
- Piracetam IP 400 mg

Description

Citiflip P Syrup is a combination of Citicoline, a neuroprotective and neuroregenerative agent, and Piracetam, a nootropic agent. It is indicated for the management of cognitive impairment and neurological disorders associated with cerebral insufficiency. The combination supports neuronal membrane repair, enhances cerebral metabolism, and improves cognitive functions.

Indications

Indicated for:

- Cognitive impairment
- Stroke and post-stroke neurological deficits
- Traumatic brain injury
- Memory disturbances
- Neurodegenerative conditions

It helps in improving memory, attention, learning capacity, and overall cognitive performance.

Dosage & Administration

- Dosage should be as directed by the physician.
- Administer using a calibrated measuring cup.
- Shake well before use.
- Duration of therapy should be based on clinical response and physician's advice.

Pharmacological Action

- **Citicoline** enhances synthesis of phosphatidylcholine, promotes neuronal membrane repair, and improves cerebral metabolism. It also increases neurotransmitter levels and supports neuroprotection.
- **Piracetam** modulates neurotransmission and improves neuronal plasticity, enhancing cerebral blood flow and cognitive function without significant sedation.

The combination provides synergistic neuroprotective and cognitive-enhancing effects.

Side Effects

Generally well tolerated.

Possible side effects include:

- Headache
- Nervousness
- Insomnia
- Gastrointestinal discomfort
- Mild agitation

Precautions & Warnings

- Use with caution in patients with severe renal impairment
- Monitor in patients with bleeding disorders
- Use during pregnancy and lactation only if clearly indicated
- Administer under medical supervision

Drug Interactions

- Caution when used with anticoagulants or antiplatelet agents
- Consult physician before combining with other nootropic or CNS-active medications

Storage

- Store below 25°C in a cool, dry place
- Protect from light
- Keep out of reach of children
