

Skinticals™

Get Flawless &
Healthy Skin with

Clinzadin™ A Gel

Clindamycin 1.00%w/w + Adapalene 0.1%w/w

Clindamycin :

- Is an excellent drug for skin and soft tissue infections.
- Is an antibiotic with good gram-positive and anaerobe coverage with often used in patients with beta-lactam allergies.
- It is significantly more effective to treat Acne vulgaris and Acne rosacea.

Adapalene :

- Shows efficacy in the treatment of acne, specifically, in regards to the skin darkening with minimal cutaneous irritation.
- Effective, safe and easy to use treatment and helps clear lesions faster than cryo-therapy
