**Beautiful Skin...**

# Clobquin S6

Clobetasol Propionate I.P. 0.05% w/w +  
Salicylic Acid I.P. 6% w/w **Ointment**

## Clobetasol Propionate :

Provides rapid relief in severe inflammatory skin disorders by reducing redness, itching, swelling, and irritation. It effectively controls psoriasis, eczema, and other resistant dermatoses, offering strong anti-inflammatory action for short-term management of stubborn skin conditions.

## Salicylic Acid :

Provides keratolytic action, removing dead skin cells, reducing scaling, unclogging pores, and enhancing skin renewal. It helps manage psoriasis, acne, dandruff, and hyperkeratotic conditions while improving penetration of topical medications.
