Clotimet B Cream

Clotimet B Cream

Composition:

Each gram contains:

- **Beclomethasone Dipropionate 0.025%** (Corticosteroid – Anti-inflammatory)
- **Clotrimazole 1%** (Antifungal)
- **Neomycin Sulphate 0.5%** (Antibacterial)
- **Chlorocresol 0.1%** (Preservative)

Description:

Clotimet B Cream is a **broad-spectrum topical formulation** used for the treatment of **fungal and bacterial skin infections** with associated inflammation. **Beclomethasone** reduces redness, swelling, and itching, while **Clotrimazole** eliminates fungal growth. **Neomycin** combats bacterial infections, and **Chlorocresol** acts as a preservative to maintain the cream's stability.

Indications:

- **Fungal skin infections** (Tinea, Ringworm, Athlete's foot)
- **Eczema & Dermatitis with secondary infections**
- **Inflammatory skin conditions** with fungal or bacterial involvement
- **Itching, redness, and swelling of the skin**

Dosage & Administration:

- Apply a **thin layer** to the affected area **twice daily** or as directed by a physician.
- **Do not cover** with airtight bandages unless advised by a doctor.
- Use **for the prescribed duration** to avoid resistance.

Contraindications:

- **Hypersensitivity** to any of the ingredients.
- **Not for use on open wounds or deep skin infections.**
- **Avoid long-term use on the face or large body areas.**

Warnings & Precautions:

- **For external use only.**
- **Avoid contact with eyes, nose, and mouth.**
- **Not recommended for children under 2 years** unless prescribed.
- **Discontinue use if irritation or worsening occurs.**

Side Effects:

- Mild **burning, itching, or irritation**
- **Skin thinning** with prolonged use
- **Allergic reactions** (rare cases)

Storage Instructions:

- **Store below 25°C in a dry place.**
- **Keep away from direct sunlight.**
