of **Triple Action**  
in One....

# Clotimet B

Beclometasone Dipropionate (0.025% w/v) +  
Clotrimazole (1% w/v) **Lotion**

## **BECLOMETASONE :**

Offers rapid anti-inflammatory, anti-allergic, and anti-pruritic action, relieving redness, itching, swelling, and irritation in various skin disorders. Its localized effect ensures quick comfort, enhances healing, improves patient compliance, and significantly boosts quality of life with minimal side effects.

## **CLOTRIMAZOLE :**

Provides broad-spectrum antifungal action, effectively treating dermatophytes, Candida, and Malassezia infections. It relieves itching, burning, scaling, and discomfort, ensures faster healing, and helps prevent recurrence of superficial fungal infections with good tolerability.

**Cures Completely and Effectively**

- Tinea infections
- Candidiasis
- Pityriasis versicolor
- Inflammatory skin conditions
- Secondary fungal infection
