Bronchospasm Associated with COPD...*

Critsal™

Critsal™ 0.31 Levosalbutamol (0.31mg) **Respule**

Critsal™ 0.63 Levosalbutamol (0.63mg) **Respule**

Critsal™ Levosalbutamol (50mcg) + Ipratropium (20mcg) **Inhaler**

Critsal™ Levosalbutamol (100mcg) + Ipratropium (40mcg) Capsules like **Rotacaps**

Critsal™ 1.25 Levosalbutamol (1.25mg) + Ipratropium (500mcg) **Respule**

Levosalbutamol

- Shows better reduction in shortness of breath, chest tightness, wheeze, cough & mucus production in comparison to the salbutamol.
- Better efficacy and safety profile than salbutamol in mild persistent asthma.

Ipratropium

- Induces bronchodilation by reducing cholinergic tone in the airway smooth muscles
- Treats air flow blockage & prevents worsening of chronic obstructive pulmonary disease
