

Critsal 0.63 Respule

Levosalbutamol (0.63mg) Respules

Product Description

Levosalbutamol (0.63mg) Respules are a nebulizer solution specifically designed to provide fast and effective relief from bronchospasm and breathing difficulties associated with asthma, chronic obstructive pulmonary disease (COPD), and other respiratory conditions. It works by relaxing the muscles in the airways, improving airflow, and allowing easier breathing.

Key Features

- **Powerful Bronchodilation:** Delivers 0.63mg of Levosalbutamol to effectively relieve bronchospasm.
- **Quick Action:** Provides rapid relief from acute asthma attacks and other respiratory distress.
- **Precise Delivery:** Designed for nebulization to target the lungs directly, enhancing efficacy.
- **Safe for Various Ages:** Suitable for adults and children, as prescribed by a healthcare provider.
- **Convenient Single-Dose Format:** Ready-to-use respules for hassle-free administration.

Indications

Levosalbutamol (0.63mg) Respules are indicated for the treatment and prevention of:

- Acute asthma attacks
- Chronic obstructive pulmonary disease (COPD)
- Exercise-induced bronchospasm
- Respiratory conditions associated with reversible airway obstruction

How It Works

Levosalbutamol is a selective beta-2 adrenergic agonist that relaxes the smooth muscles of the bronchial tubes, leading to bronchodilation. This action reduces airway resistance, improves airflow, and facilitates easier breathing.

Dosage and Administration

- **Recommended Dose:**

- **Adults and Adolescents (above 12 years):** One respule (0.63mg) via nebulization, 2-3 times daily, or as directed by your physician.
- **Children (6-12 years):** Dosage as prescribed by the doctor.

Steps for Use:

1. Remove a respule from the pack.
2. Twist off the cap to open the respule.
3. Empty the contents into the nebulizer chamber.
4. Use the nebulizer as instructed, inhaling the mist until the solution is fully consumed.
5. Discard the empty respule.

Precautions

- Use under medical supervision, especially in children.
- Do not exceed the prescribed dosage to avoid side effects.
- Inform your doctor about any medical conditions, such as heart problems, high blood pressure, or thyroid disorders, before use.
- Avoid use if you are allergic to Levosalbutamol or any of its components.

Side Effects

Common side effects may include:

- Tremors or shakiness
- Palpitations
- Headache
- Muscle cramps
- Throat irritation or dryness

If any side effects persist or worsen, seek medical advice immediately.

Storage Instructions

- Store in a cool, dry place at temperatures below 25°C.
 - Protect from light and moisture.
 - Keep out of reach of children.
-

Why Choose Levosalbutamol (0.63mg) Respules?

This higher-strength formulation is ideal for individuals requiring more potent relief from bronchospasm. With targeted delivery via nebulization, it ensures quick and effective action, making it a reliable solution for managing respiratory conditions and improving quality of life.

Important Note: Always use as prescribed by a healthcare professional.
