

Cufsniff AL Syrup

Ambroxol (15mg/5ml) + Guaifenesin (50mg/5ml) + Levocetirizine (2.5mg/5ml) + Menthol (1mg/5ml) Syrup

Composition: Each 5 ml of syrup contains:

- **Ambroxol** – 15 mg
- **Guaifenesin** – 50 mg
- **Levocetirizine** – 2.5 mg
- **Menthol** – 1 mg

Pharmacological Actions:

1. **Ambroxol:** An expectorant and mucolytic agent, Ambroxol works by breaking down mucus, making it less viscous and easier to expel. It stimulates the production of surfactant, which improves the function of the respiratory system.
2. **Guaifenesin:** An expectorant that helps loosen up mucus in the airways, making it easier to clear the chest of mucus. It increases the volume and reduces the viscosity of respiratory tract secretions.
3. **Levocetirizine:** An antihistamine that helps to relieve allergy symptoms such as sneezing, runny nose, itching, and watery eyes. It works by blocking the effects of histamine, a substance released during allergic reactions.
4. **Menthol:** Provides a cooling sensation and acts as a mild analgesic, which helps relieve throat irritation. It also has a soothing effect on the respiratory tract.

Indications:

- Cough associated with the common cold, bronchitis, or other respiratory tract infections.
- Relief from excessive mucus production and congestion.
- Allergic conditions, such as allergic rhinitis and sinusitis.
- Soothing effect on the throat, reducing irritation and cough.

Dosage and Administration:

- **Adults:** 10-15 ml, 2-3 times daily.
- **Children (6-12 years):** 5-10 ml, 2-3 times daily.
- **Children (2-6 years):** 2.5-5 ml, 2-3 times daily.
- **Infants under 2 years:** Not recommended.

The syrup should be taken orally, with or without food. Shake well before use.

Contraindications:

- Hypersensitivity to any of the components of the syrup.
- Patients with a history of severe renal or hepatic impairment should avoid use.
- Not recommended for infants under 2 years old.

Warnings and Precautions:

- Caution should be exercised in patients with pre-existing respiratory conditions such as asthma or chronic obstructive pulmonary disease (COPD).
- Levocetirizine may cause drowsiness; therefore, caution should be taken when driving or operating heavy machinery.
- Not recommended during pregnancy unless necessary. Should only be used if prescribed by a doctor during breastfeeding.

Side Effects:

- **Common:** Drowsiness, dry mouth, dizziness, nausea, gastrointestinal discomfort, and mild allergic reactions.
- **Rare:** Skin rash, difficulty breathing, and swelling of the face or throat.

Storage: Store at room temperature (15-25°C) in a tightly closed container. Keep away from light and moisture. Keep out of reach of children.

Presentation: Available in 100 ml and 200 ml bottles.
