

## Cufsniff LS Drop

**Ambroxol (7.5mg) + Levosalbutamol (0.25mg)  
+ Guaifenesin (12.5mg) Drop**

---

- **Wheezing and shortness of breath due to bronchospasm or obstruction.**
- 

### Description:

**Ambroxol 7.5mg + Levosalbutamol 0.25mg + Guaifenesin 12.5mg Drop is a combination medication used to treat respiratory conditions that involve excessive mucus production, coughing, and bronchospasm. It is commonly used in conditions like acute or chronic bronchitis, asthma, and chronic obstructive pulmonary disease (COPD). The combination of Ambroxol, Levosalbutamol, and Guaifenesin helps to:**

- **Reduce bronchospasm (Levosalbutamol),**
  - **Loosen mucus and make it easier to expel (Ambroxol and Guaifenesin),**
  - **Enhance airway clearance and improve breathing.**
- 

### Composition:

**Each 1 ml of the drop contains:**

- **Ambroxol: 7.5 mg**
  - **Levosalbutamol: 0.25 mg**
  - **Guaifenesin: 12.5 mg**
- 

### Indications:

**This combination drop is used for the treatment of:**

- **Acute and chronic respiratory conditions such as bronchitis, asthma, and COPD.**
- **Cough with excessive mucus production.**

### Mechanism of Action:

- **Ambroxol:**
    - **Ambroxol is a mucolytic agent that helps to break down and thin mucus in the airways, making it easier to clear the mucus through coughing.**
  - **Levosalbutamol:**
    - **Levosalbutamol is a bronchodilator that works by relaxing the muscles around the airways (bronchi), making it easier to breathe by reducing bronchospasm (tightening of the airways).**
  - **Guaifenesin:**
    - **Guaifenesin is an expectorant that works by thinning and loosening mucus in the airways, which helps to relieve chest congestion and makes coughing more productive.**
- 

### Side Effects:

**While generally well-tolerated, possible side effects may include:**

- **Common side effects:**
  - **Mild nausea or vomiting.**
  - **Mouth irritation or dry throat.**
  - **Headache.**
  - **Dizziness.**
- **Serious side effects (rare):**
  - **Allergic reactions such as rash, swelling of the face or throat, difficulty breathing.**

- **Palpitations or rapid heart rate (due to Levosalbutamol).**
- **Severe abdominal discomfort or stomach cramps.**

- **Concurrent use with cough suppressants may reduce the effectiveness of Ambroxol and Guaifenesin in loosening mucus.**

**If you experience any serious side effects, seek medical help immediately.**

---

#### **Precautions:**

- **Pregnancy and Breastfeeding:**
  - **The safety of this medication during pregnancy or breastfeeding has not been fully established. Consult your doctor before use if you are pregnant or breastfeeding.**
- **Pre-existing Heart Conditions:**
  - **Levosalbutamol may cause increased heart rate and palpitations. Use with caution in individuals with heart conditions, such as hypertension or arrhythmias.**
- **Asthma and Bronchospasm:**
  - **Although effective, caution should be used in patients with severe asthma, as it may lead to worsening symptoms if not properly monitored.**
- **Liver and Kidney Disorders:**
  - **If you have liver or kidney problems, inform your healthcare provider as dose adjustments may be required.**

---

#### **Storage Instructions:**

- **Store at room temperature (15°C to 30°C).**
  - **Keep the bottle tightly closed when not in use.**
  - **Keep out of reach of children.**
  - **Shake well before use.**
- 

#### **Note:**

**Always use Ambroxol + Levosalbutamol + Guaifenesin Drops as directed by your healthcare provider. It is essential to follow the prescribed dosage and not exceed the recommended amount. If symptoms persist or worsen, consult your doctor for further evaluation and possible adjustments to your treatment plan.**
