

Cyproslab T Syrup

Cyproheptadine Syrup 200ml

Product Description

Cyproheptadine syrup is an antihistamine used to treat allergic conditions, stimulate appetite, and manage various conditions involving histamine and serotonin imbalance. It works by blocking histamine and serotonin receptors, making it effective for relieving allergy symptoms and promoting weight gain in individuals with poor appetite.

Composition

- **Cyproheptadine Hydrochloride** (Active Ingredient)

Mechanism of Action

Cyproheptadine is a first-generation antihistamine that works by blocking H1 histamine receptors, reducing allergic reactions such as sneezing, itching, runny nose, and hives. Additionally, it has serotonin-blocking properties, which contribute to its appetite-stimulating effects, making it beneficial in underweight individuals and conditions like anorexia.

Indications

- Allergic reactions such as hay fever, rhinitis, and urticaria
- Appetite stimulation in underweight individuals or those with poor nutritional intake
- Management of migraine and vascular headaches
- Relief from dermatological conditions like eczema and contact dermatitis
- Treatment of anaphylaxis (as an adjunct to epinephrine)
- Prevention of serotonin syndrome in certain conditions
