

Dazodox 100 Dry Syrup

Composition (per 5 ml after reconstitution):

- **Cefpodoxime Proxetil I.P.** – 100 mg (as dry syrup formulation)

Description:

Dazodox 100 Dry Syrup contains Cefpodoxime Proxetil, a third-generation oral cephalosporin antibiotic. It is indicated for the treatment of a wide range of bacterial infections in pediatric patients. Cefpodoxime exhibits broad-spectrum antibacterial activity and is effective against both Gram-positive and Gram-negative organisms. It works by inhibiting bacterial cell wall synthesis, leading to bacterial lysis and death.

Indications:

- Upper and lower respiratory tract infections
- Pharyngitis and tonsillitis
- Otitis media
- Sinusitis
- Skin and soft tissue infections
- Urinary tract infections

Mechanism of Action:

Cefpodoxime Proxetil is a prodrug that is hydrolyzed in the gastrointestinal tract to release the active compound, Cefpodoxime. It binds to penicillin-binding proteins (PBPs), inhibiting the final step in the synthesis of the bacterial cell wall, leading to cell lysis and death.

Dosage and Administration:

- **Children:** Dose to be determined by the physician based on body weight and severity of infection.
- Shake well before each use. Administer after reconstitution with the specified volume of boiled and cooled water.

Contraindications:

- Known hypersensitivity to cephalosporins or penicillins
- Severe renal impairment without dose adjustment

Precautions:

- Use with caution in patients with renal impairment
- History of gastrointestinal disease, especially colitis
- Monitor for signs of hypersensitivity during treatment

Side Effects:

- Common: Diarrhea, nausea, abdominal pain
- Rare: Rash, urticaria, allergic reactions, pseudomembranous colitis

Storage:

- Store the dry powder in a cool, dry place below 25°C.
- After reconstitution, store in a refrigerator (2°C–8°C) and use within 7 days.
- Keep out of reach of children.
