

Dectyle 25

Dectyle 25

Nandrolone Decanoate Injection USP (25 mg/ml)

Description

Dectyle 25 is a solution for injection containing Nandrolone Decanoate, a synthetic anabolic steroid with therapeutic benefits. It aids in tissue repair, recovery from debilitating conditions, and stimulation of red blood cell production.

Composition

Each ml of injection contains:

- Nandrolone Decanoate USP: 25 mg
 - Excipients: [Details based on formulation]
-

Pharmacological Actions

Nandrolone Decanoate is an anabolic steroid that promotes protein synthesis, leading to increased muscle mass and red blood cell production. It works by enhancing nitrogen balance, supporting bone density, and stimulating erythropoiesis (production of red blood cells).

- **Anabolic Effects:** Promotes tissue-building and recovery.
 - **Erythropoietic Activity:** Enhances red blood cell production, useful in treating anemia.
-

Indications

Dectyle 25 is indicated for:

- Management of anemia associated with chronic kidney failure.
 - Treatment of osteoporosis in postmenopausal women.
 - Adjunctive therapy for chronic conditions causing muscle wasting and weight loss.
 - Supporting recovery after major surgery, trauma, or illness.
-

Dosage and Administration

- **Adults:** 25-50 mg via deep intramuscular injection every 1-4 weeks, depending on the condition.
 - **Children:** Dosage determined by body weight and clinical need (under medical supervision).
 - Administration must be carried out by a qualified healthcare professional.
-

Contraindications

Dectyle 25 should not be used in:

- Known hypersensitivity to Nandrolone or any excipients.
 - Patients with prostate or breast cancer.
 - Severe liver or kidney impairment.
 - Pregnancy and breastfeeding.
-

Warnings and Precautions

- **Liver Function:** Monitor liver enzymes during prolonged use.
- **Prostate Health:** Regular evaluation for prostate cancer in elderly males.
- **Heart and Kidney Disease:** Use with caution in patients with cardiovascular or renal conditions.

- **Misuse: Avoid misuse for athletic performance enhancement, as it can lead to severe side effects.**
-

Side Effects

Common Side Effects:

- Acne, oily skin, and hair growth.
- Fluid retention and swelling.
- Changes in libido or mood.

Rare but Serious Side Effects:

- Liver dysfunction (jaundice, elevated liver enzymes).
- Cardiovascular issues (high blood pressure).
- Virilization in women (voice changes, hair growth).
- Allergic reactions (rash, difficulty breathing).

Seek medical attention for severe or persistent side effects.

Drug Interactions

Inform your doctor about all medications you are taking, as Dectyle 25 may interact with:

- Anticoagulants like warfarin (risk of bleeding).
 - Corticosteroids (enhanced fluid retention).
 - Insulin or oral antidiabetic drugs (monitor blood glucose levels).
-

Storage

- Store below 30°C in a cool, dry place.
- Protect from light and moisture.
- Keep out of reach of children.

Packaging

Available as a 1 ml single-use vial in sterile packaging.

Disclaimer

This medication should only be used under the supervision of a qualified healthcare provider. Adhere to the prescribed dosage and seek medical advice if symptoms persist or adverse effects occur.
