

Diltriz SR 30 Tablet

Brand Name: Diltriz SR 30 Tablet

Dosage Form: Sustained Release Tablet

Composition:

Each sustained-release tablet contains:

- Diltiazem Hydrochloride IP 30 mg
-

Description:

Diltriz SR 30 Tablet contains Diltiazem, a calcium channel blocker used in the management of cardiovascular disorders such as hypertension and angina pectoris. The sustained-release formulation ensures prolonged drug release and consistent therapeutic effect. It helps in reducing cardiac workload, improving coronary circulation, and maintaining blood pressure control.

Indications:

Indicated for the treatment of:

- Hypertension
- Chronic stable angina
- Vasospastic angina
- Certain supraventricular arrhythmias

It helps in controlling blood pressure, reducing frequency of anginal episodes, and improving cardiovascular performance.

Dosage & Administration:

Dosage should be as directed by the physician.

The tablet should be swallowed whole with water and should not be crushed or chewed.

Administer regularly at the same time each day for optimal therapeutic effect.

Pharmacological Action:

- Diltiazem inhibits calcium ion influx into vascular smooth muscle and myocardial cells.
- It produces coronary and peripheral vasodilation, reducing myocardial oxygen demand.
- It also slows atrioventricular nodal conduction and decreases cardiac workload.

These actions help in improving blood flow and stabilizing cardiovascular function.

Side Effects:

Common side effects include dizziness, headache, flushing, edema, nausea, and fatigue.

Rarely, bradycardia, hypotension, or hypersensitivity reactions may occur.

Precautions & Warnings:

- Use with caution in patients with cardiac conduction abnormalities or heart failure
- Monitor blood pressure and pulse rate during therapy
- Use cautiously in elderly patients and those with hepatic impairment
- Avoid abrupt discontinuation without physician advice

• **Pregnancy and lactation use should be based on clinical assessment**

Drug Interactions:

May interact with beta-blockers, digoxin, antihypertensive agents, and CYP3A4 inhibitors. Concomitant use with other cardiac depressants may increase the risk of bradycardia or hypotension.

Storage:

Store below 25°C in a cool, dry place.

Protect from light and moisture.

Keep out of reach of children.
