

Information For the User
Duloxetine (30mg)

Dulopair 30 Tablet

Composition (per tablet):

Duloxetine — 30 mg

Description:

Dulopair 30 Tablet contains Duloxetine, a selective serotonin and norepinephrine reuptake inhibitor (SNRI) used to treat major depressive disorder, generalized anxiety disorder, neuropathic pain, fibromyalgia, and chronic musculoskeletal pain. It works by increasing the levels of serotonin and norepinephrine in the central nervous system, improving mood and reducing pain perception.

Indications:

Indicated for the treatment of major depressive disorder, generalized anxiety disorder, diabetic peripheral neuropathic pain, fibromyalgia, and chronic musculoskeletal pain including chronic low back pain and osteoarthritis.

Mechanism of Action:

Duloxetine inhibits the reuptake of serotonin and norepinephrine in the CNS, thereby enhancing their activity in the synaptic cleft. This dual-action mechanism contributes to its antidepressant and analgesic effects.

Dosage and Administration:

Recommended dose is 30 mg once daily. Dosage may be adjusted by the physician based on therapeutic response and tolerability. To be taken orally with or without food.

Contraindications:

Contraindicated in patients with hypersensitivity to Duloxetine, uncontrolled narrow-angle glaucoma, or those taking monoamine oxidase inhibitors (MAOIs).

Warnings and Precautions:

Use with caution in patients with hepatic or renal impairment. May increase risk of suicidal thoughts, especially in young adults. Monitor for signs of serotonin syndrome when used with other serotonergic agents.

Drug Interactions:

Potential interactions with MAO inhibitors, SSRIs, SNRIs, anticoagulants, and CNS depressants. Caution is advised during concomitant use.

Side Effects:

Common side effects include nausea, dry mouth, drowsiness, dizziness, constipation, and fatigue. Rarely, may cause liver dysfunction, hypertension, or suicidal ideation.

Overdosage:

Symptoms may include somnolence, serotonin syndrome, seizures, or cardiovascular instability. Supportive and symptomatic treatment is recommended.

Storage:

Store in a cool, dry place below 30°C. Protect from light and moisture. Keep out of reach of children.
