

Information For the User
Flupirtine (100mg) + Thiocolchicoside (4mg) Tablet

Flupitale TH Tablet

Brand Name: Flupitale TH Tablet

Dosage Form: Tablet

Composition:

Each film-coated tablet contains:

- **Flupirtine Maleate 100 mg**
 - **Thiocolchicoside 4 mg**
-

Description:

Flupitale TH Tablet is a combination analgesic and muscle relaxant used for the management of acute and chronic musculoskeletal pain. **Flupirtine** provides central analgesic action, while **Thiocolchicoside** helps reduce muscle spasm and stiffness, improving mobility and comfort.

Indications:

Indicated for the treatment of:

- Acute and chronic muscle spasms
- Low back pain
- Cervical pain
- Post-traumatic or post-operative muscular conditions

It helps in **relieving pain and improving muscle relaxation** in neuromuscular and orthopedic conditions.

Dosage & Administration:

Dose should be taken as prescribed by the physician.

Swallow tablet whole with water. Do not crush or chew.

Pharmacological Action:

- **Flupirtine:** Acts as a selective neuronal potassium channel opener, exhibiting analgesic and neuroprotective effects.
 - **Thiocolchicoside:** A muscle relaxant that works by acting on GABA receptors to reduce muscle spasms.
-

Side Effects:

Generally well tolerated. Mild dizziness, drowsiness, or gastrointestinal discomfort may occur in some patients.

Warnings & Precautions:

- May cause drowsiness; avoid driving or operating machinery.
 - Use with caution in patients with liver impairment.
 - Not recommended during pregnancy or lactation unless advised by a physician.
-

Drug Interactions:

Caution when used with sedatives, alcohol, or CNS depressants.

Storage:

Store below 25°C in a cool, dry place. Protect from moisture, heat, and light.
Keep out of reach of children.
