

Flutialfa F 500 Capsules

**Fluticasone Propionate 500 mcg +
Formoterol Fumarate 12 mcg Life Cap
(FlipCaps)**

Product Description

**Fluticasone Propionate 500 mcg +
Formoterol Fumarate 12 mcg FlipCaps
(Life Cap)** is a combination medication
used to manage and treat asthma and
chronic obstructive pulmonary disease
(COPD). These capsules are designed for
inhalation using a compatible dry powder
inhaler (DPI). The combination of a
corticosteroid and a long-acting beta-
agonist helps control symptoms, improve
lung function, and prevent exacerbations.

Composition

Each capsule contains:

- **Fluticasone Propionate: 500 mcg
(Corticosteroid)**
 - **Formoterol Fumarate: 12 mcg
(Long-Acting Beta2-Agonist)**
-

Mechanism of Action

1. **Fluticasone Propionate (500 mcg):**
 - A synthetic corticosteroid that
reduces inflammation and
swelling in the airways.

- Helps prevent symptoms like
wheezing, coughing, and
shortness of breath.

2. **Formoterol Fumarate (12 mcg):**

- A long-acting bronchodilator
that relaxes the muscles in the
airways.
 - Provides fast and sustained
relief by keeping airways open
for easier breathing.
-

Indications

- **Asthma:** For patients who require
regular maintenance therapy and
bronchodilator action.
 - **COPD:** For long-term maintenance
treatment of airflow obstruction in
patients with chronic bronchitis or
emphysema.
-

Dosage & Administration

- **Recommended Dose:** As prescribed
by a healthcare professional.
 - **Administration:**
 - Use with a compatible dry
powder inhaler (DPI).
 - Do not swallow the capsule; it
is meant for inhalation only.
 - Follow the inhaler's
instructions for proper use.
-

Key Benefits

- ✓ Provides both anti-inflammatory and bronchodilator effects.
 - ✓ Reduces the frequency of asthma attacks and COPD exacerbations.
 - ✓ Improves breathing capacity and overall lung function.
 - ✓ Convenient once- or twice-daily dosing, depending on the severity.
-

Precautions

- **Not for Acute Attacks:** Not intended for relieving sudden breathing problems. Always keep a rescue inhaler (short-acting bronchodilator) handy for emergencies.
 - **Rinse Mouth:** Rinse your mouth after each use to prevent oral thrush.
 - **Consult Doctor:** Before use if you are pregnant, breastfeeding, or have other medical conditions.
-

Storage

- Store in a cool, dry place (below 25°C).
 - Keep capsules in their original packaging to protect from moisture.
 - Keep out of reach of children.
-

Possible Side Effects

- **Common:** Headache, sore throat, oral thrush, hoarseness, and cough.
- **Rare but Serious:** Tremors, palpitations, muscle cramps, and signs of infection.

If side effects persist or worsen, consult a healthcare professional immediately.
