Fosfohub™

Fosfomycin (3gm) Sachet

- Fosfomycin is indicated for the treatment of acute uncomplicated lower urinary tract infections in adults, caused by pathogens sensitive to fosfomycin.
- Fosfomycin is indicated for periprocedural prophylaxis in diagnostic and surgical transurethral procedures.
- Used to treat bladder infections (e.g. acute cystitis or lower urinary tract infections) in women.
- It works by stopping the growth of bacteria.

In

Uncomplicated Cystitis

Bacterial infections of UTI

Inhibit Bacterial Cell Wall Synthesis

Inactivating Pyruvate Transferase
