

Information For the User
Furosemide 20 mg + Spironolactone 50 mg tablet

Furohype S Tablet

Brand Name: Furohype S Tablet

Composition:

Each uncoated tablet contains:

Furosemide IP 20 mg

Spironolactone IP 50 mg

Therapeutic Indication:

Indicated in the treatment of edema associated with congestive heart failure, liver cirrhosis, and nephrotic syndrome

Helps in the management of hypertension in patients requiring combined diuretic therapy

Useful in cases where potassium loss needs to be minimized

Mechanism of Action:

Furosemide is a loop diuretic that inhibits sodium and chloride reabsorption in the loop of Henle, leading to increased urine output

Spironolactone is a potassium-sparing diuretic and aldosterone antagonist that promotes sodium excretion and potassium retention

The combination provides effective diuresis with potassium conservation

Dosage & Administration:

Dosage to be adjusted according to the patient's response and clinical condition

Usually one tablet once or twice daily or as directed by the physician

Best taken in the morning to avoid nocturia

Contraindications:

Anuria or acute renal failure

Hyperkalemia

Hypersensitivity to Furosemide, Spironolactone, or sulfonamides

Addison's disease

Warnings & Precautions:

Monitor electrolytes, renal function, and blood pressure regularly

Use with caution in patients with diabetes, hepatic impairment, or elderly patients

Avoid potassium supplements or other potassium-sparing drugs unless prescribed

Discontinue if signs of hyperkalemia occur

Side Effects:

Common: dizziness, headache, increased urination, nausea, muscle cramps

Serious: hyperkalemia, hyponatremia, dehydration, gynecomastia (from spironolactone), hypotension

Storage:

Store in a cool, dry, and dark place below 25°C

Keep out of reach of children

Packaging:

Furohype S Tablet is available in alu-alu/blister strip packs

Schedule:

Schedule H Prescription Drug – Not to be sold without the prescription of a registered medical practitioner
