

Information For the User
Glutathione (1200mg) Injection

Gluthasil 1200 Injection

Brand Name: Gluthasil 1200 Injections

Dosage Form: Injection

Composition:

- **Glutathione I.P. 1200 mg**

Therapeutic Segment:

Antioxidant / Detoxification Segment

Therapeutic Indication:

Gluthasil 1200 Injection is indicated for:

- **Detoxification and liver support** in conditions of oxidative stress
- **Skin lightening and complexion enhancement therapy**
- **Management of chronic liver disorders** (as an adjunct therapy)
- **Anti-aging and free radical scavenging**

It helps in **protecting cells from oxidative damage, enhancing liver function, and reducing pigmentation.**

Mechanism of Action:

- **Glutathione** is a **tripeptide antioxidant** that neutralizes free radicals and reactive oxygen species.
- It **detoxifies harmful substances** in the liver and promotes **cellular repair**.
- Supports **melanin regulation**, contributing to skin brightening effects.

Dosage & Administration:

- Administered via **intravenous (IV) infusion** under medical supervision.
- Dose and frequency depend on **therapeutic indication** and patient condition.

Contraindications:

- Hypersensitivity to **glutathione or any excipients**
- Not recommended in patients with **severe renal impairment**

Warnings & Precautions:

- Use under **medical supervision only**
- Monitor for **allergic reactions** during administration
- Caution in patients with **asthma or pulmonary disorders**

Possible Side Effects:

- Mild injection site pain or redness
- Nausea, abdominal discomfort
- Rarely: rash, headache, dizziness, or allergic reactions

Storage:

Store below 25°C, protected from light and moisture.

Use immediately after reconstitution or as directed by the physician.

Segment:

Antioxidant / Detoxification Segment – It helps in **neutralizing free radicals, supporting liver function, and improving skin health.**
