

# Glycopryl 50 Rota Capsule

**Brand Name:** Glycopryl 50 Rota Capsule

**Dosage Form:** Rota Capsule

**Therapeutic Category:** Anticholinergic – Bronchodilator

**Composition:**

Each Rota Capsule contains:

- Glycopyrrolate IP – 50 mcg
- Excipients q.s.

**Pharmacology & Mechanism of Action:**

Glycopyrrolate is a long-acting anticholinergic agent that competitively inhibits muscarinic receptors in the airways. By blocking parasympathetic-mediated bronchoconstriction, it causes bronchodilation and reduces mucus secretion, improving airflow in patients with obstructive airway diseases.

**Indications:**

- Chronic obstructive pulmonary disease (COPD)
- Bronchial asthma (as adjunct therapy)
- Maintenance therapy for reversible airway obstruction

**Dosage & Administration:**

- Adults: 1 Rota Capsule twice daily or as directed by the physician
- Swallow whole with water; do not chew or crush
- Use regularly for optimal therapeutic effect

**Contraindications:**

- Hypersensitivity to Glycopyrrolate or any component of the formulation
- Patients with narrow-angle glaucoma or urinary retention

**Warnings & Precautions:**

- Use with caution in patients with cardiac disorders, arrhythmias, or gastrointestinal obstruction
- Discontinue if signs of hypersensitivity occur
- Not recommended for pediatric patients unless prescribed by a physician

**Adverse Effects:**

- Dry mouth, throat irritation
- Headache, dizziness
- Rare: urinary retention, blurred vision, tachycardia

**Storage:**

Store below 25°C in a dry place

Protect from light and moisture

Keep out of reach of children

Manufactured in India for:
