

Glycovil Cream

Glycolic Acid 6% Cream

Introduction

This **Glycolic Acid 6% Cream** is a **dermatologically tested exfoliating and skin-renewing formulation** that helps improve **skin texture, tone, and clarity**. Glycolic Acid, an **alpha hydroxy acid (AHA)**, is known for its **keratolytic properties**, which help in **removing dead skin cells, unclogging pores, and stimulating collagen production**. This cream is designed to **brighten dull skin, reduce fine lines, and improve acne-prone or hyperpigmented skin**.

Composition

Each gram of cream contains:

- **Glycolic Acid: 6%**

Pharmacological Profile

1. Glycolic Acid (6%) – AHA-Based Skin Exfoliant

Overview:

Glycolic Acid is a **water-soluble alpha hydroxy acid (AHA)** derived from sugarcane. It is one of the most effective **chemical exfoliators** used in skincare.

Mechanism of Action:

- **Exfoliates the skin by breaking down dead skin cell bonds**, promoting natural cell turnover.
- **Unclogs pores**, preventing acne formation.
- **Stimulates collagen production**, improving skin elasticity and reducing fine lines.
- **Enhances skin hydration** by improving moisture retention.

Clinical Benefits:

- **Removes dead skin cells**, revealing brighter and smoother skin.
- **Reduces hyperpigmentation, dark spots, and melasma**.
- **Minimizes acne breakouts and blackheads by keeping pores clear**.
- **Diminishes fine lines and early signs of aging**.

Indications & Therapeutic Uses

This **Glycolic Acid 6% Cream** is recommended for:

- **Dull, rough, and uneven skin texture**.
- **Acne-prone skin and clogged pores**.
- **Hyperpigmentation, melasma, and dark spots**.
- **Fine lines and early signs of aging**.
- **Keratosis pilaris and mild skin roughness**.

Directions for Use

- **Application:** Apply a thin layer to clean, dry skin and massage gently until absorbed.
- **Frequency:** Use **once daily at night** or as directed by a dermatologist.
- **Sun Protection:** **Always apply sunscreen (SPF 30 or higher) during the day** when using glycolic acid, as it increases sun sensitivity.

Precautions & Warnings

- **For external use only** – avoid contact with eyes, lips, and mucous membranes.
- **Mild tingling or slight redness** may occur upon application, which is normal.
- **Perform a patch test** before first use, especially for sensitive skin.
- **Not suitable for individuals with very sensitive or compromised skin barriers**.
- **Avoid using alongside other exfoliants, retinoids, or harsh skincare products** unless advised by a dermatologist.

Possible Side Effects

Although well-tolerated, some individuals may experience:

- **Mild irritation, redness, or tingling sensation.**
- **Temporary skin dryness or peeling** in initial use.
- **Increased sun sensitivity**, requiring strict sun protection.

Storage Instructions

- Store in a **cool, dry place** away from direct sunlight.
- Keep at **room temperature (below 25°C)**.
- **Keep out of reach of children.**

Conclusion

This **Glycolic Acid 6% Cream** is a **highly effective exfoliating and skin-renewing treatment**, ideal for individuals seeking **brighter, smoother, and acne-free skin**. With its **powerful AHA action**, it gently removes dead skin cells, enhances **collagen production**, and **reduces pigmentation and acne scars**.

For best results, use consistently at night and follow with a broad-spectrum sunscreen during the day. Always consult a dermatologist for personalized guidance.
