

Information For the Use of
Benzyl Nicotinate (2mg) + Heparin (50IU) Cream

Thrompool Cream

Brand Name: Thrompool Cream

Dosage Form: Cream

Composition:

Each gram contains:

- Benzyl Nicotinate IP 2 mg
- Heparin Sodium IP 50 IU
- Cream base q.s.

Description:

Thrompool Cream is a topical formulation containing Benzyl Nicotinate, a vasodilator, and Heparin, an anticoagulant agent. It is indicated for the management of superficial thrombophlebitis, localized inflammation, and soft tissue injuries. It helps in improving local blood circulation, reducing inflammation, and supporting resolution of superficial clots and swelling.

Indications:

Indicated for the management of:

- Superficial thrombophlebitis
- Localized hematoma and bruising
- Sprains and soft tissue injuries
- Varicose vein-associated discomfort

It helps in reducing pain, swelling, inflammation, and improving local circulation.

Dosage & Administration:

Apply a thin layer over the affected area 2–3 times daily or as directed by the physician.

Massage gently until absorbed.

For external use only.

Avoid contact with eyes, mucous membranes, and open wounds.

Pharmacological Action:

- Benzyl Nicotinate acts as a local vasodilator, increasing blood flow to the affected area and promoting healing.
- Heparin Sodium possesses anticoagulant and anti-inflammatory properties that help prevent clot extension and reduce localized edema.

Together, these actions help in relieving inflammation and improving tissue recovery.

Side Effects:

Common side effects include mild skin irritation, redness, warmth, or itching at the application site.

Rarely, allergic or hypersensitivity reactions may occur.

Precautions & Warnings:

- For external use only
- Do not apply on broken or infected skin

- **Use with caution in patients with bleeding disorders**
 - **Discontinue use if severe irritation or allergic reaction occurs**
 - **Keep out of reach of children**
-

Drug Interactions:

Systemic interactions are unlikely due to minimal absorption.

However, caution is advised in patients using systemic anticoagulants or antiplatelet medications.

Storage:

Store below 25°C in a cool, dry place.

Protect from direct sunlight.

Keep the tube tightly closed after use.

Do not freeze.
