

*Ideal Therapy to
Treat Duodenal Ulcer*

Ilapprime - DSR

Ilaprazole 10mg & Domperidone 30mg Capsules

Get Relief From GERD Effectively.

- Reduce stomach acid production to treat conditions like Gastroesophageal Reflux Disease (GERD) and peptic ulcers.
- Used to alleviate symptoms like nausea and bloating by accelerating gastric emptying.
- Effective for treating dyspepsia (indigestion) and other acid-related disorders where delayed stomach emptying is a contributing factor.
- Provides comprehensive relief from both acid reflux and associated motility symptoms.

Indications:

 Gastroesophageal Reflux Disease	 Peptic Ulcer Disease
 Dyspepsia (Indigestion)	 Nausea and Vomiting
