

Itoplit 50 Tablet

Brand Name: Itoplit 50 Tablet

Dosage Form: Tablet

Therapeutic Category: Prokinetic – Gastrointestinal Motility Enhancer

Composition:

Each film-coated tablet contains:

- **Itopride Hydrochloride IP** – 50 mg
- Excipients – q.s.

Pharmacology & Mechanism of Action:

Itopride is a gastroprokinetic agent that enhances gastrointestinal motility by antagonizing dopamine D2 receptors and inhibiting acetylcholinesterase activity. This dual action increases acetylcholine availability in the gastrointestinal tract, improving gastric emptying and accelerating intestinal transit. Itopride also modulates gastrointestinal motility without affecting gastric acid secretion significantly.

Indications:

- Functional dyspepsia
- Gastroesophageal reflux disease (GERD) with delayed gastric emptying
- Nausea and vomiting associated with gastrointestinal motility disorders
- Postoperative gastroparesis

Dosage & Administration:

- **Adults:** 50 mg three times daily, 15–30 minutes before meals or as directed by the physician
- Tablets should be swallowed whole with water
- Dose adjustment may be required in patients with severe renal or hepatic impairment

Contraindications:

- Hypersensitivity to Itopride or any component of the formulation
- Gastrointestinal hemorrhage, obstruction, or perforation
- Pheochromocytoma (risk of hypertensive crisis)

Warnings & Precautions:

- Use cautiously in patients with hepatic or renal impairment
- Monitor for extrapyramidal symptoms in long-term use
- Pregnancy and lactation: use only if clearly needed

Drug Interactions:

- Itopride may enhance the absorption of other drugs by accelerating gastric emptying
- Caution with anticholinergic drugs, which may reduce its efficacy

Adverse Effects:

- Common: Abdominal discomfort, diarrhea, nausea
- Less common: Dizziness, headache
- Rare: Extrapyramidal symptoms, galactorrhea

Storage:

- Store below 25°C in a dry place
- Protect from light and moisture
- Keep out of reach of children
