Levocetirizine (2.5mg) + Montelukast (4mg)

Monclip LC Suspension

Levocetirizine (2.5 mg) + Montelukast (4 mg) Suspension is a combination medication used primarily for managing allergic conditions such as allergic rhinitis, hay fever, and asthma. Here's a detailed description:

Composition:

Levocetirizine: 2.5 mgMontelukast: 4 mg

Indications:

This suspension is indicated for:

- 1. Allergic Rhinitis: Sneezing, nasal congestion, and runny nose due to seasonal or perennial allergens.
- 2. Asthma: As an adjunct therapy for mild to moderate persistent asthma.
- 3. Chronic Urticaria: Management of itching and hives associated with chronic idiopathic urticaria.

Mechanism of Action:

- Levocetirizine: A selective H1antihistamine that reduces the effects of histamine, alleviating allergy symptoms like sneezing, itching, and nasal congestion.
- Montelukast: A leukotriene receptor antagonist (LTRAs) that inhibits leukotrienes responsible for airway inflammation, bronchoconstriction, and other allergic responses.

- Children (6 months-5 years): 2.5 mL once daily or as prescribed by a physician.
- Children (6–11 years): 5 mL once daily or as directed.
- Shake the bottle well before use.
 Administer with a measuring spoon or syringe for accurate dosing.

Contraindications:

- Known hypersensitivity to either Levocetirizine, Montelukast, or other components of the formulation.
- Severe renal impairment.

Precautions:

- Liver Function: Use with caution in patients with hepatic impairment.
- Drowsiness: Levocetirizine may cause mild drowsiness in some cases. Avoid activities requiring mental alertness until tolerance is determined.
- Behavioral Changes: Montelukast may rarely cause mood changes or behavioral disturbances.

Side Effects:

- Common: Drowsiness, headache, dry mouth, abdominal pain, diarrhea.
- Rare: Mood changes, dizziness, and skin rash.

Storage Instructions:

- Store at room temperature (15–30°C).
- Protect from light and moisture.

Dosage and Administration:

• Keep out of reach of children.

Note:

This is a prescription medication and should be used under the supervision of a healthcare professional. Do not exceed the recommended dose.
