

Critsal IT Respule

Brand Name: Critsal IT Respule

Dosage Form: Inhalation Respule

Therapeutic Category: Bronchodilator – Combination (Beta-2 Agonist + Anticholinergic)

Composition:

Each 2 ml respule contains:

- Levosalbutamol IP – 0.63 mg
- Ipratropium Bromide IP – 500 mcg
- Excipients q.s.

Pharmacology & Mechanism of Action:

Levosalbutamol is a selective beta-2 adrenergic agonist that relaxes bronchial smooth muscles, resulting in bronchodilation. Ipratropium bromide is an anticholinergic agent that blocks muscarinic receptors in the airways, reducing bronchoconstriction and mucus secretion. The combination provides rapid and sustained relief from bronchospasm in obstructive airway diseases.

Indications:

- Bronchial asthma
- Chronic obstructive pulmonary disease (COPD)
- Acute exacerbations of bronchospasm
- Maintenance therapy in reversible airway obstruction

Dosage & Administration:

- Adults and children above 6 years: 1–2 respules via nebulization 2–3 times daily or as directed by the physician
- Use with a standard jet nebulizer connected to oxygen or compressed air
- Administer slowly and inhale the mist deeply for optimal effect
- Clean nebulizer after each use

Contraindications:

- Hypersensitivity to Levosalbutamol, Ipratropium, or any component of the formulation
- Avoid in patients with known severe hypersensitivity to atropine derivatives

Warnings & Precautions:

- Use with caution in patients with cardiovascular disorders, arrhythmias, or hyperthyroidism
- Monitor heart rate and blood pressure during therapy
- Not recommended for pediatric patients below 6 years without physician guidance
- Discontinue if paradoxical bronchospasm occurs

Adverse Effects:

- Tremors, headache, palpitations
- Dry mouth, cough, throat irritation
- Rarely: arrhythmias or hypersensitivity reactions

Storage:

Store below 25°C in a dry place

Protect from light and moisture

Keep out of reach of children
