

Lexoziff-Plus™

Eye Drops

Broad Spectrum Antibiotic

Levofloxacin offers broad-spectrum action against Gram-positive and Gram-negative bacteria.

Effective in Ocular Infections

Indicated for conjunctivitis, keratitis, blepharitis and other anterior segment infections.

Fast Symptom Relief

Provides rapid relief from redness, irritation, discharge and discomfort.

Penetrates Deep into Ocular Tissues

Excellent corneal penetration ensures effective drug concentration at the infection site.

Safe & Well Tolerated

Minimal irritation with excellent ocular tolerance for better patient compliance.

Convenient & Easy to Use

Easy-to-use eye drop formulation for precise dosing and better adherence.

Indications

Bacterial
Conjunctivitis

Bacterial
Keratitis

Blepharitis
