

Information For the User

Linagliptin (5mg) Tablet

Linzatin 5 Tablet

Brand Name: Linzatin 5 Tablet

Dosage Form: Tablet

Composition:

Each film-coated tablet contains:

- **Linagliptin IP 5 mg**
-

Description:

Linzatin 5 Tablet contains **Linagliptin**, a DPP-4 inhibitor used in the management of **Type 2 Diabetes Mellitus**. It helps in **enhancing incretin activity, increasing insulin secretion, and lowering post-prandial and fasting blood glucose levels**.

Indications:

Indicated for:

- Type 2 Diabetes Mellitus, either as monotherapy or in combination with other antidiabetic agents when diet and exercise alone do not provide adequate glycemic control.

It helps in **maintaining effective and sustained glycemic control**.

Dosage & Administration:

Dosage should be individualized as directed by the physician.

Swallow the tablet whole with water; it may be taken with or without food.

Pharmacological Action:

Linagliptin inhibits dipeptidyl peptidase-4 (DPP-4), prolonging the action of incretin hormones. This increases glucose-dependent insulin secretion and reduces glucagon release, helping regulate blood glucose.

Side Effects:

Mild headache, nasopharyngitis, or slight gastrointestinal discomfort may occur in some patients.

Warnings & Precautions:

- Use with caution in patients with renal impairment.

- Monitor blood glucose regularly.
 - Inform your physician of any history of pancreatitis.
-

Drug Interactions:

May interact with strong CYP3A4 or P-glycoprotein inducers.
Caution with concomitant antidiabetic medications to avoid hypoglycemia.

Storage:

Store in a cool, dry place below 25°C. Protect from light and moisture.
Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.
