

Information For the User

Lisinopril 2.5 mg Tablet

Lisitake 2.5 Tablet

Brand Name: Lisitake 2.5 Tablet

Composition:

Each uncoated tablet contains:

Lisinopril Dihydrate IP equivalent to Lisinopril 2.5 mg

Therapeutic Indication:

Indicated for the treatment of mild to moderate hypertension

Used in the management of heart failure as adjunctive therapy

Helps improve survival in patients with left ventricular dysfunction post-myocardial infarction

Also used in diabetic nephropathy to reduce albuminuria

Mechanism of Action:

Lisinopril is an ACE (Angiotensin-Converting Enzyme) inhibitor

It blocks the conversion of angiotensin I to angiotensin II, a potent vasoconstrictor

Results in vasodilation, reduced blood pressure, and decreased aldosterone secretion

Improves cardiac function and reduces progression of heart failure

Dosage & Administration:

Usual starting dose is 2.5 mg to 5 mg once daily, depending on the indication and patient's clinical status

Dose may be adjusted by the physician based on blood pressure response

Can be taken with or without food

To be used as directed by the physician

Contraindications:

Hypersensitivity to lisinopril or other ACE inhibitors

History of angioedema related to previous ACE inhibitor use

Hereditary or idiopathic angioedema

Pregnancy and lactation

Severe renal artery stenosis

Warnings & Precautions:

Monitor renal function and electrolytes regularly

May cause hyperkalemia, especially in patients with renal impairment or those taking potassium-sparing diuretics

Caution in patients with volume depletion or heart failure

Discontinue immediately if angioedema or persistent dry cough occurs

Side Effects:

Common: dizziness, headache, fatigue, hypotension, dry cough

Less common: hyperkalemia, nausea, rash

Serious: angioedema, renal dysfunction, severe hypotension

Storage:

Store in a cool, dry, and dark place below 25°C
Protect from light and moisture
Keep out of reach of children

Packaging:

Lisitake 2.5 Tablet is available in blister or alu-alu strips

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
